

# Ten Top Tips for Endodontic Success

## Course details:

This course provides general dental practitioners with clinical tips and advice for each stage of an endodontic procedure.

### Objectives:

#### Learners will be able to:

- Describe the benefits and limitations of 2D x-rays and CBCT in endodontics.
- Discuss the location of root canals and common variations in anatomy.
- Discuss the use of apex locators.
- Explain the benefits of irrigations and the various solutions available.
- Describe the shaping of root canals with rotary and reciprocating systems.
- Select the appropriate obturation method for their practice.
- Discuss the benefits of single vs multiple visit endodontics.
- Apply the appropriate guidelines for case selection and specialist referral.

### Learning Outcomes

#### The learner understands:

- the factors that influence success in endodontics
- the features and benefits of modern endodontic material and equipment
- how to safely and effectively use irrigants in endodontics
- the appropriate choice of obturation system and material
- the importance of case selection.

Course duration: 09:00-15:30

Price: £120 per participant (incl. 1 3D printed tooth).

CPD: 6 hours

Entry: 10-12 places available at each location
